

Why I NEED a phone

**A PRESENTATION BY
NANDANA SIJITH**

Popularity of phones

Phones have been around for a long time. And each year, a new phone comes. A phone doesn't have an age limit. Anyone at any age can get a phone, however it's up to the parents to let their children have phones. This presentation is an opportunity for me to trigger your thoughts into letting me have a phone. Hope you enjoy!!

1. Intro

These are the 3 chapters of this presentation:

→ **Emergency**

How a phone will help during a emergency or a situation.

→ **Good behavior**

How a phone will help develop responsibilities and good behavior.

→ **Contact/interaction**

How a phone will help develop social skills.

Chapter 1: EMERGENCY

Emergencies can happen any moment, sneaking up on unexpectedly.

What if something bad happens at school?

What if we get lost at the mall?

What if I needed to call you for assurance?

Let's talk about how a phone can help us in these situations and how it plays an important part to helping with our daily lives.

A PHONES' HELP : IT'S NEEDED

Remember the time when the first early release rolled around at school? We all thought that I would arrive home at 1:00. In the morning, when I arrived, i realized that it ended at 12:30! That's the time that amma will be picking up kanna from preschool, and acha would have probably been at work!! When I told the teacher this, do you know the first thing he asked?? He asked, "Do you have a phone to call your parents??" of course I said no and I even was so nervous that I forgot acha's phone number. I felt ashamed to have been calling through the teacher's phone and making it seem like i don't know acha's phone number! Think how easier it would have been if I had a phone and just call you. If I were to be lost at the mall, I could just call you to find me. A phone is the best way to help me in emergencies, because it is something we need nowadays.

Chapter 2: Good behavior

Examples

Examples how phones can help create good behavior

→ **earned**

A phone has to be earned, so set a goal.
If I reach the goal, I will get a phone.

→ **Responsibilities**

A new phone will bring new
responsibilities so having a phone will
help me become more responsible.

Chapter 3:

CONTACT/INTERACTION

contact/interaction

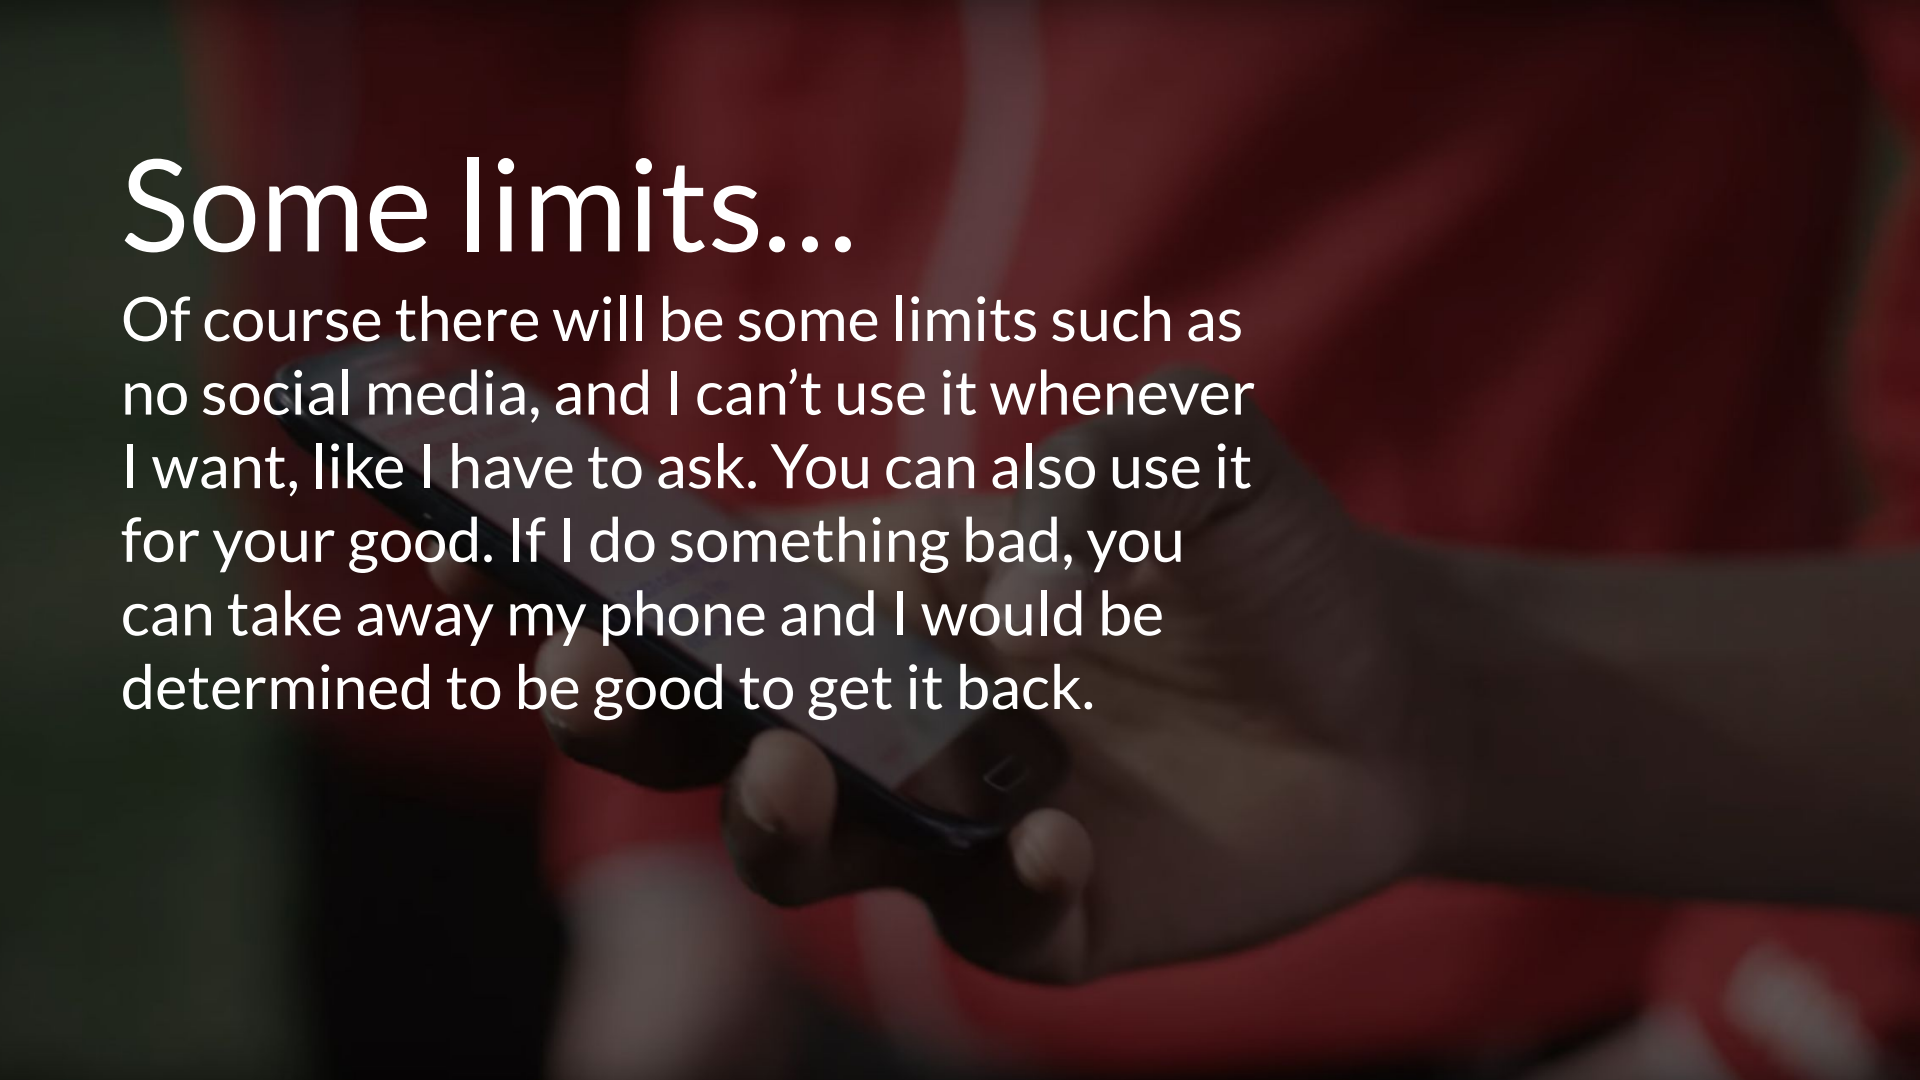

A phone is important because it gives us a chance to contact people we know. Think about amma. Without her phone, she and her friends could have never planned the Las Vegas trip. She would have never called grandma everyday. It's important for people to interact with humans. having friends is important and a phone is the best way to communicate people weather we see them everyday or not

Story for illustration purposes only

Some limits...

Of course there will be some limits such as no social media, and I can't use it whenever I want, like I have to ask. You can also use it for your good. If I do something bad, you can take away my phone and I would be determined to be good to get it back.

A hand holding a black smartphone, with the screen showing a dark interface. The background is a blurred red surface, possibly a wall or a piece of clothing.

WHAT IF IT'S A NO?

IF IT'S A NO...

If it is a no then, there is a possible way for all of us to be happy!

You can make me my own phone number and then I don't have to text my friends using acha's phone number!

Its a win-win!

This presentation is now over

Take your time to decide and let me know what you think!!

bye!!
